Main Service PT Solusi Amanah Mandiri

**Airfreight
Export & Import**

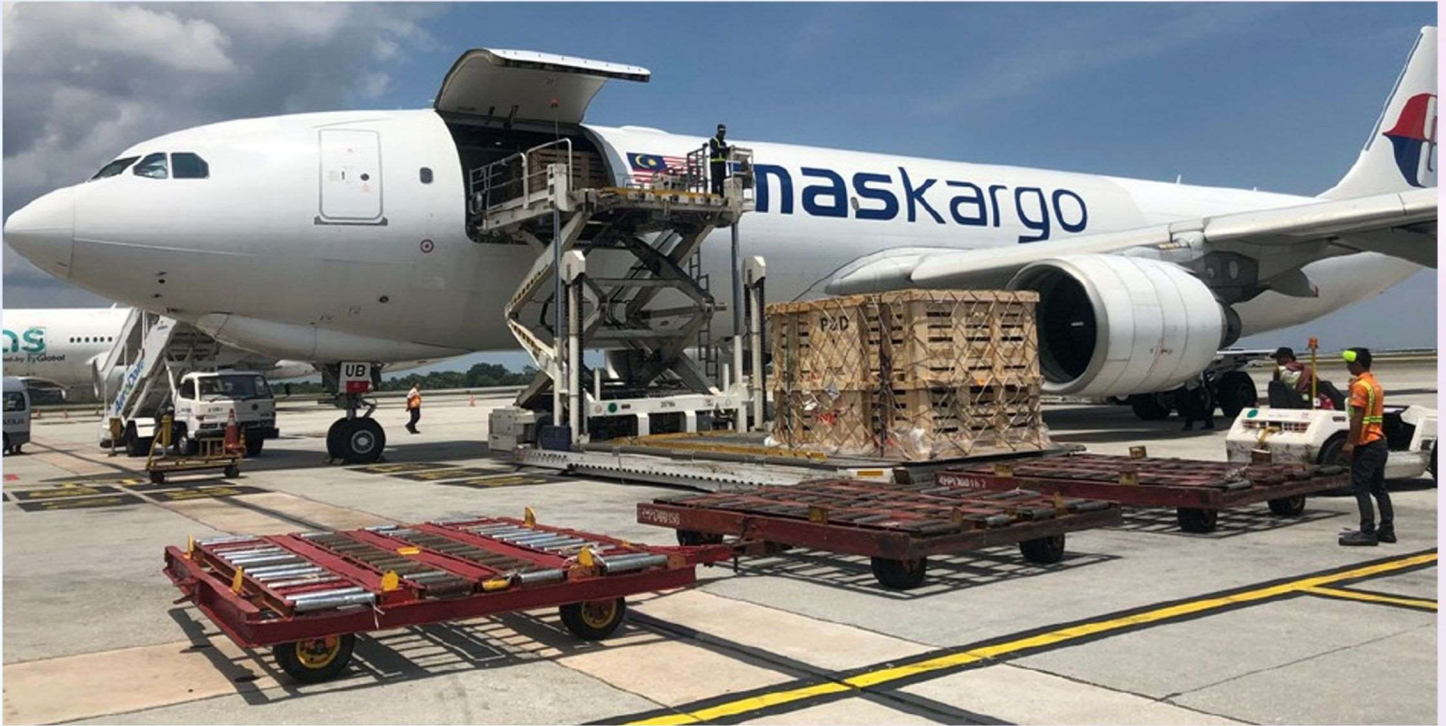

**Seafreight :
LCL & FCL
Export and Import**

**Customs Brokerage
and Trucking Service**

Airfreight : Export & Import

PT Solusi Amanah Mandiri

We are ready to carry out the mandate for handling shipments via air. Although all Airfreight shipment in Surabaya use passenger aircraft where the cargo is placed in the belly of the aircraft, shipping using passenger aircraft provides more flexibility because the frequency of delivery is much more frequent than freighter aircraft. Airlines are generally very precise in planning flight schedules so that delivery speeds are more reliable.

Seafreight : LCL and FCL, Export and Import

PT Solusi Amanah Mandiri

We are committed to provide the best option in every shipment via Sea, either in FCL or LCL mode. FCL is the second fastest shipping mode after airfreight which has better cost efficiency for cargo with large volume. Cargo is not mixed with other goods from different shipper and the seal is not open when the cargo in transshipment port, making FCL mode have lower risk compared to LCL. Certain commodity such as food and fragile goods are more suitable to ship with FCL mode.

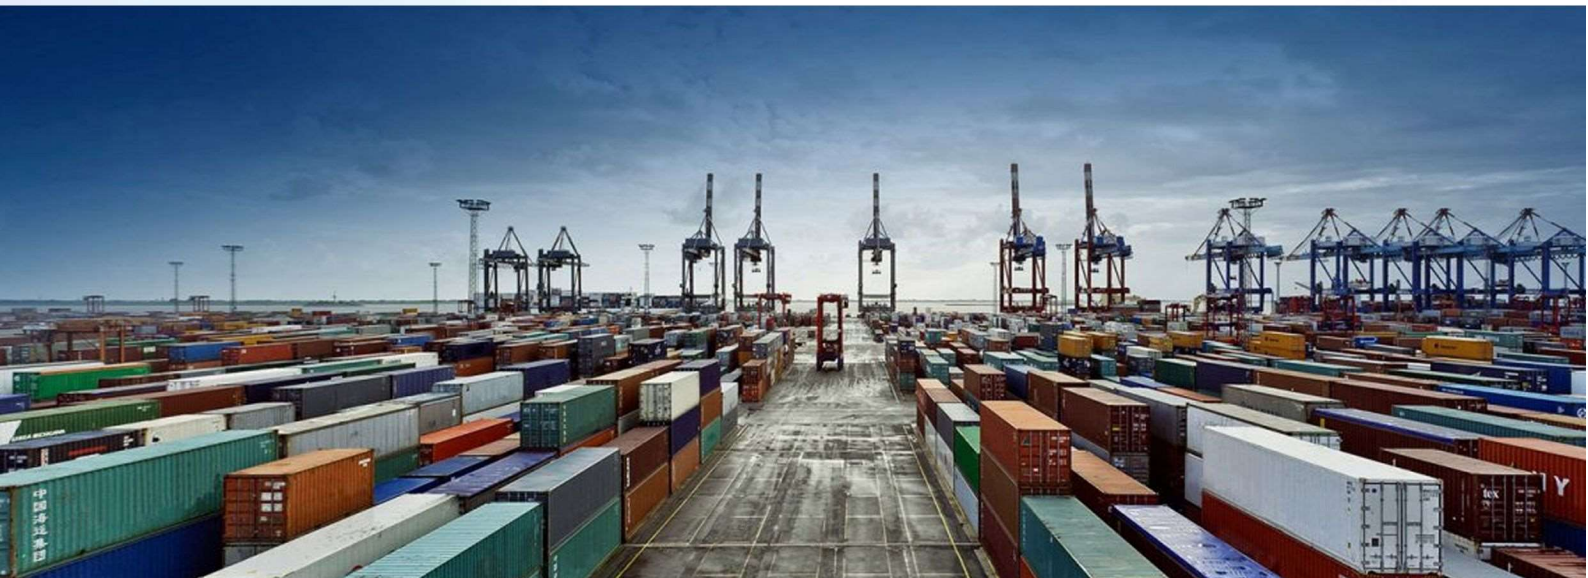

For smaller volume, we also provide LCL Service. If in FCL we have to pay the cost per container, in LCL we will need to pay only for the volume needed. Moreover, for certain commodity, sending the small quantity goods in a regular basis will help warehouse inventory management process. In Peak Season Condition, LCL delivery is the stable option to consider.

Customs Brokerage and Trucking Service

PT Solusi Amanah Mandiri

The high complexity of Indonesian Customs Clearance process requires good knowledge, high integrity, and fast responsiveness to complete the job properly. We offer accuracy and clarity in the procedure and cost calculation in every Customs Brokerage jobs. Every progress in the clearance and trucking process will be updated with detail and intensively. We will be fully responsible for every trust given.
